SUMMARY

Product-focused Senior iOS Engineer with 9+ years of experience building high-performance, polished consumer applications for massive user bases. Expert in **SwiftUI**, **Swift**, and **Objective-C**. Passionate about technical craftsmanship and building fluid, accessible user experiences in high-growth, fast-paced environments.

SKILLS

Languages & Frameworks:

- Swift (Advanced)
- SwiftUI (Production Level)
- Objective-C
- UIKit
- Combine
- Async/Await
- Python
- Agentic AI Development

Architecture & Design:

- SOLID Principles
- VIPER, MVC, MVVM, Design Patterns

- Multithreading (GCD/Concurrency)

Tools:

- Git Strategies
- CI/CD Infrastructure (Fastlane, Jenkins)
- Xcode
- Unit Testing
- App Store Connect, TestFlight
- Xcode Instruments (Time Profiler, Leaks)
- Crashlytics
- Backend Development (Python)
- Flutter

EXPERIENCE

Senior Software Engineer / Deutsche Telekom Digital Labs - Gurugram

11/2022 - Current

- **Product Engineering:** Engineered and optimized the AppleTV (tvOS) ecosystem across multiple international markets (NatCos), mainly worked the UI for the Player and Home modules.
- **Technical Innovation:** Led the design and documentation of an **In-App Agent Architecture**, focusing on modularity and scalable agent-driven interactions within the iOS ecosystem and cross platform.
- Built a locally hosted **RAG (Retrieval-Augmented Generation) Application** to automate Unit Test generation for new modules, significantly increasing development speed.
- **Media & Analytics:** Implemented specialized Player analytics for commission settlement and integrated comprehensive user analytics services (MoEngage, Google Analytics) to drive product decisions.
- **Leadership:** Mentored junior developers through code reviews and technical learning sessions to maintain high codebase standards.
- **CI/CD Management:** Keeping the CI/CD pipeline running, and managing the provisioning profiles and certificates via scripts.
- **Exploration and Learning:** Worked on agentic AI to develop a system of diagnostic agents to help with 80% faster diagnostic and RCA finding.

Software Engineer / Deutsche Telekom Digital Labs - Gurugram

04/2020 - 10/2022

- Implemented user analytics services for MoEngage, Google Analytics, and in-house systems.
- Contributed significantly to app setup for new country launch.

- Developed player analytics for commission settlement across various National Companies.
- Enhanced overall app user experience through targeted bug fixes.

Software Engineer / OYO - Gurugram

11/2018 - 03/2020

- **Speed & Execution:** Led the end-to-end implementation of new Login and Signup flows, ensuring rapid deployment to improve user conversion ease international user onboarding.
- **User Obsession:** Executed a major UI/UX revamp, transitioning the app from Frames to **AutoLayout** to ensure a seamless, modern experience for a massive user base.
- **Infrastructure:** Established a basic CI server for build automation and authored comprehensive Unit Tests to ensure product stability.
- **Growth:** Played a key role in delivering major features and critical updates.
- **Release Management & Stability:** Owned the end-to-end App Store release lifecycle, including managing provisioning profiles, code signing, and versioning for global deployments.

Software Engineer / Zomato - Gurugram

06/2017 - 10/2018

- **Product Thinking:** Collaborated cross-functionally with Product, Design, and Backend teams to evolve app features from concept to traction for one of India's largest consumer platforms.
- **Reliability:** Focused on overall app experience improvements and critical bug fixes to maintain high user retention in a high-growth environment.

EDUCATION AND TRAINING

Bachelor of Technology

National Institute of Technology Rourkela - Rourkela, Odisha

GPA: 7.4
